

Assumption

Evidence can be upload .jpeg, .png, .pdf only types.

The evidence can be uploading assigned person or admin only

After upload the evidence send the notification or email to admin.

ID	Task	Description	Dependencies	Acceptance Criteria
01	Login to the system	Implement user authentication and display tasks based on the logged-in user's permissions/identity.	User ID, authentication API, database user records	User can log in using a valid username/email and password. Invalid credentials are rejected. Only authorized tasks are displayed to the user.
02	Display all tasks in the table	Display the user's accessible tasks in the dashboard with task title, description, status, assigned user, and relevant dates.	01	All authorized tasks are displayed in a table. Empty and loading states are handled correctly.
03	Create, edit and delete tasks	Implement CRUD operations for creating new tasks, editing existing tasks, and deleting tasks.	01, 02; Task API and database	User can create, edit, and delete tasks. Changes are persisted in the database and reflected in the task list.
04	Assign tasks to users	Add an assigned-user field and allow an authorized user/admin to assign a task to a specific user.	01, 03; User and Task database relationship	A task can be assigned to a valid user. The assigned user's name is displayed on the task. Unauthorized users cannot assign tasks.
05	Filter tasks and view task details	Add filters for task status and assigned person. Selecting a task opens a dedicated task details screen.	04; Task assignment and task API	Users can filter by status, assigned person, or both. Selecting a task opens <code>/tasks/[id]</code> and displays complete task information.
06	Upload evidence for task completion	Allow the assigned user to upload a document as evidence that the task has been completed. Store the document and its metadata securely.	05; File storage, Evidence database model	Only the assigned user can upload evidence. Valid documents can be uploaded and associated with the correct task. Invalid files are rejected. Evidence status is shown on the task details page.
07	Admin review and approve task completion	Create an admin review workflow where submitted evidence can be approved or rejected. Rejected evidence can be resubmitted by the assigned user.	06; Admin role/authorization	Admin can view submitted evidence and approve or reject it. Approval changes the task status to <code>DONE</code> . Rejection keeps the task incomplete and allows the user to resubmit evidence.
